Gokseong melons

13brix ▲

The melon grown in Gokseong is an Earls line belonging to the high-end netted-melon and has a very distinctive flavor. Gokseong Melon has a thick and stable net with 13 Brix or more, and the pulp is thick and yellowish and has excellent taste.

Gokseong Melon

Gokseong Melon is a high-grade melon of the Earls line

- Optimal location for melon cultivation due to inland climate (average annual temperature of 13.6° C)
- High-quality melon cultivation possible due to the big daily temperature swing between day and night due to topographical features (the annual range: 24.8° C)
- 1 vine with 1 fruit production technology, strong melon scent (musk)
- Thorough screening and quality contro by non-destructive saccharimeter (GAP, etc.)
- Shipment : May ~ November

The efficacy of Gokseong Melon, which has the best taste and nutrition

- High in iron, niacin, vitamin A, and vitamin C and good for antioxidant effects (good for weak patients and examinees who are prone to fatigue)
- Rich in beta-carotene, a major ingredient that fights cancer
- Discharge waste out of the body quickly
- High sugar content and moisture content and good for relieving hangovers

How to enjoy eating melons

Gokseong Melon only selects melons over 13Brix, so you can eat them right away. If you want to eat more delicious melons, eat them after after-ripening.

2 to 3 days of after-ripening in the shade of room temperature.

If you purchased it with stalk, it can be stored at room temperature for 5 days.

Store in a cool place with no direct sunlight.

※ Do not put the melon in the refrigerator (or sugar level decrease) 2 to 3 hours before you eat it.

High-quality Gokseong Melon is exported abroad.

- Export safe agricultural products through quarantine registration of export quarantine complex and fresh vegetable cultivation area
- Produce agricultural products suitable for each exporting country through regular residual pesticide tests
- Endeavor to extend the expiration date by introducing and utilizing freshness maintenance technology
- Distribute high-quality agricultural products through securing stable quantities and selection
